

PAINT ADDITIVE

What is Suretherm Paint Additive?

Suretherm paint additive should be added to emulsion paint after the walls and ceilings have been cleaned and prepared. This product will stop grime/stains from mould caused by condensation.

Application

Add 100ml to 5 litres of standard emulsion paint and mix thoroughly until an even colour is achieved. Simply apply as per paint manufacturer's instructions.

Storage

Store safely in frost-free conditions away from direct sunlight, sources of heat and foodstuffs.

Cleaning

Clean equipment as per paint manufacturer's instructions.

Precautions

Ensure the area is well ventilated before use. Wear personal protective equipment (mask, gloves, safety eyewear etc.)

Storage

Store safely in frost-free conditions away from direct sunlight,
