

Telemetric System

Our telemetric systems are suitable for where the possibility of pump failure through either a pump fault or loss of mains power would be catastrophic.

It is designed to alert the end user should a high level condition or loss of power occur. It notifies the end user by sending a pre-recorded message alerting them of the system fault. The system is available within the majority of our products, it is also available as an add on module that can be retro-fitted to existing products.

- Up to 6 programmable telephone numbers (including mobiles)
- Audio\Visual indicators on control panel
- Alarm mute function on control panel
- Battery backup for high level alarm (optional extra)
- The cable length can be extended if used with an appropriate junction box and cable subject to distance (please contact your supplier for the details).

Telemetric (Hard-wired)

Should a fault occur a pre-recorded message is sent to up to six key holders alerting them (this includes mobiles) and continues to do so until the call is acknowledged by one of the recipients. Please note that a land line or extension is required.

TECHNICAL SPECIFICATIONS

Power Supply	230V
Cable Length	5m
