

CLEANING SPRAY

What is Suretherm Preparation Treatment?

Suretherm Cleaning Spray is designed to remove surface grime and stains caused by condensation and black mould. It does not contain any harmful biocides and is contains natural ingredients. This product should be used to clean walls and ceilings before repainting with Suretherm paint.

Application

Apply to affected areas evenly and leave for 10-15 minutes before wiping down lightly to remove any remaining residue. It is also advised to spray 300mm around the affected area to ensure the area is cleaned thoroughly.

Storage

Store safely above 5°C and in frost-free conditions away from direct sunlight, sources of heat and foodstuffs.

After use

Clean any cloths or sponges with warm soapy water to remove treatment.

Precautions

Ensure the area is well ventilated during and after use.
Wear relevant personal protective equipment (mask, gloves, safety eyewear etc.)
