

# Sovereign Timber Treatment

Sovereign Timber Treatment contains a resin, pigments in a low odour solvent. The product also contains biocides for the protection of the coating.

## Product Code

Straw: **30806153**  
 Red Cedar: **30806158**  
 Green: **30806513**  
 Brown: **30806478**

## Description

Sovereign Timber Treatment contains a resin, pigments in a low odour solvent. The product also contains biocides for the protection of the coating. Sovereign Timber Treatment can be used for pre-treating all types of soft or hard wood.

Sovereign Timber Treatments are designed to give a fast drying quality treatment with a UV stable colour that can be subsequently painted or stained.

Form Supplied:	Solvent based, ready to use
Pack Sizes:	5 Litres
Colour Range:	Straw, Red Cedar, Green and Brown*
Contains:	Biocide for the protection of the coating

## Properties

Provides protection from initial manufacture to installation. Once installed a full weatherproof timber coating should be applied e.g. Sovereign SX70 Woodstain or primer and paint.

\*Brown Timber Treatment contains bitumen so should not be overcoated.

## Preparation

Timber should be dry, clean and free from sawdust

## General

Suitable for all types of soft and hardwood applications such as: Windows, doors/frames, skirting and rails, floorboards, roofing timbers, soffits, sheds, fencing and garden furniture.

## GUIDELINES FOR USE IN DIP TANKS

1. Empty and clean out the tank thoroughly on a regular basis (at least every 6 months).
2. Always cover when not in use.
3. Stir gently before use.
4. Use as much 'old' material up as possible before topping up the tank.
5. Do not dip damp wood.
6. The wood to be dipped must be free from sawdust, wood shavings, or other extraneous materials.
7. Use a grate raised above the bottom of the tank so that any debris, etc. is deposited below.
8. Ensure that the tank is not contaminated with, for example, solvent washings from paint brushes, etc. as this can also lead to settlement/separation.
9. Do not blend with other products, as they could be incompatible.

A gel forming in the tank and/or loss of colour indicates the tank is excessively contaminated with sawdust and requires emptying, cleaning and new treatment using.

## GENERAL MAINTENANCE

Timber coated with Sovereign Timber Treatment should have a further protective coating applied as soon after installation as possible. Traditional wood coatings such as paints, stains and varnishes are suitable.

## LIMITATIONS

Brown Timber Treatment should not be over coated in paint due to its bitumen content. Once weathered it can be primed with Sovereign Stain Blocking Primer and then painted with e.g. gloss. Normally Brown Timber Treatment is used on rough sawn timber such as sheds and fences and is reapplied as and when required.

## CLEAN UP

Use white spirit or brush cleaner on tools and brushes.

## DRYING TIME

Typically touch dry in 3 - 4 hours and hard dry overnight under ideal conditions.

## COVERAGE

Approximately  
Dip: 3 minutes minimum  
Spray: 6 - 7 m<sup>2</sup>/litre  
Brush: 4 - 5 m<sup>2</sup>/litre

**Storage:** Between 5°C - 30°C.

**Shelf Life:** 12 months unopened.

## HEALTH & SAFETY

- ! Keep out of reach of children.
- ! Keep away from food, drink and animal feeding stuff. When using do not eat, drink or smoke.
- ! Avoid contact with skin and eyes.
